

## **SERVICES/ PROCEDURE**

### **RF Frequency & Cavitation**

**One Session RF Only 45 min \$120**

**Two Session 30 min RF and 30 min Cavitation \$275**

**Three Session 30 min RF and 30 min Cavitation \$295**

**Radio frequency waves are used to heat the skin tissue where the collagen fibers are embedded. The local heating causes an immediate contraction of the collagen fibers and the fat cells drain then shrink. New collagen fibers are stimulated to produce new collagen and elastic fibers, resulting in tighter and smoother skin.**

**Laser Lipo: Min. of 3, \$225**

**One 60 min Session \$85**

**Laser Lipo directs energy from cold lasers and targets the adipocyte fat cells (without damaging the surrounding tissue). The laser causes pores within the cell membranes to open temporarily causing water, glycerol and free fatty acids to move out of the cell and into the interstitial space. Laser Lipo is FDA approved treatment using Class 2, 3B laser beams to remove fat and instant.**

**Vaginal Rejuvenation: Min of 3, \$300**

**One Session \$125**

**Two Session \$225**

**Vaginal Rejuvenation is a non-invasive cosmetic procedure that offers a complete rejuvenation including labial remodeling (labia reduction) and vaginal tightening. It uses the body's natural processes to stimulate collagen production and restore the vaginal and vulvar areas to a more youthful state.**

### **Body Contouring packages**

#### **Bronze Package**

**Our Bronze Package was design to achieve minimum results based on previous dietary service. Each session includes four types of service. Facial Services is included in this package and is provided during the Laser Lipo session.**

#### **3 Sessions Laser Lipo \$575**

**Laser Lipo directs energy from cold lasers and targets the adipocyte fat cells (without damaging the surrounding tissue). The laser causes pores within the cell membranes to open temporarily causing water, glycerol and free fatty acids to move out of the cell and into the interstitial space.**

**Laser Lipo is FDA approved treatment using Class 2, 3B laser beans to remove fat and instant.**

### **3 Sessions Cavitation**

**Cavitation destroys fat cells by using low frequency sound waves. Once the fat cell is destroyed, the fat is discharged between the cells where they are turned into protein and then changed to free fatty acid and glycerol. Free fatty acids are moved to the liver where they decay and are removed from the body while glycerol is used for energy.**

### **3 Session Sauna Fat Blaster One Session \$70**

**After each treatment we ask the client to lay in device for 45 minutes. This causes muscles throughout the body to contract and relax very rapidly, which stimulates the lymphatic system to help eliminate the fat contents**

### **Silver Package:**

**Our Silver Package was design to achieve minimum max results. Each session includes four types of service. Facial Services is included in this package and is provided during the Laser Lipo session.**

### **6 Sessions Laser Lipo \$1150**

**Laser Lipo directs energy from cold lasers and targets the adipocyte fat cells (without damaging the surrounding tissue). The laser causes pores within the cell membranes to open temporarily causing water, glycerol and free fatty acids to move out of the cell and into the interstitial space.**

**Laser Lipo is FDA approved treatment using Class 2, 3B laser beans to remove fat and instant.**

## **6 Sessions Cavitation**

**Cavitation destroys fat cells by using low frequency sound waves. Once the fat cell is destroyed, the fat is discharged between the cells where they are turned into protein and then changed to free fatty acid and glycerol. Free fatty acids are moved to the liver where they decay and are removed from the body while glycerol is used for energy.**

## **6 Session Sauna Fat Blaster**

**After each treatment we ask the client to lay device for 45 minutes. This causes muscles throughout the body to contract and relax very rapidly, which stimulates the lymphatic system to help eliminate the fat contents.**

## **Gold Packages**

**Our Gold Package was design to achieve minimum max results. Each session includes four types of service. Facial Services is included in this package and is provided during the Laser Lipo session.**

## **9 Sessions Laser Lipo \$1725**

**Laser Lipo directs energy from cold lasers and targets the adipocyte fat cells (without damaging the surrounding tissue). The laser causes pores within the cell membranes to open temporarily causing water, glycerol and free fatty acids to move out of the cell and into the interstitial space.**

**Laser Lipo is FDA approved treatment using Class 2, 3B laser beans to remove fat and instant.**

## **9 Sessions Cavitation**

**Cavitation destroys fat cells by using low frequency sound waves. Once the fat cell is destroyed, the fat is discharged between the cells where they are turned into protein and then changed to free fatty acid and glycerol. Free fatty acids are moved to the liver where they decay and are removed from the body while glycerol is used for energy.**

## **9 Session Sauna Fat Blaster**

**After each treatment we ask the client to lay device for 45 minutes. This causes muscles throughout the body to contract and relax very rapidly, which stimulates the lymphatic system to help eliminate the fat contents.**

## **Platinum Package**

**Our Platinum Package was design to achieve minimum max results. Each session includes four types of service. Facial Services is included in this package and is provided during the Laser Lipo session.**

## **15 Sessions Laser Lipo \$2000**

**Laser Lipo directs energy from cold lasers and targets the adipocyte fat cells (without damaging the surrounding tissue). The laser causes pores within the cell membranes to open temporarily causing water, glycerol and free fatty acids to move out of the cell and into the interstitial space.**

**Laser Lipo is FDA approved treatment using Class 2, 3B laser beans to remove fat and instant.**

## **15 Sessions Cavitation**

**Cavitation destroys fat cells by using low frequency sound waves. Once the fat cell is destroyed, the fat is discharged between the cells where they are turned into protein and then changed to free fatty acid and glycerol. Free fatty acids are moved to the liver where they decay and are removed from the body while glycerol is used for energy.**

## **15 Session Sauna Fat Blaster**

**After each treatment we ask the client to lay device for 45 minutes. This causes muscles throughout the body to contract and relax very rapidly, which stimulates the lymphatic system to help eliminate the fat contents.**
